SUMMARY

Software Engineer with 3.5+ years building cross-platform mobile apps with Flutter. Skilled in offline-first architectures and REST APIs. Early adopter of AI-assisted development. Mentored junior developers, published and maintained production apps on Google Play Store and App Store.

PROFESSIONAL EXPERIENCE

Software Engineer

Aug 2022 - Present

Lazycoders LLC (formerly Right Brain Solution Limited), Dhaka, Bangladesh

- Built and shipped 5+ production Flutter apps (Android and iOS) for multiple clients
- Maintained and developed the mobile side of **Appza** (wordpress.org/plugins/appza-builder), a no-code WordPress app builder product family (Appza Woo, Appza Fluent, Fluent Community Mobile)
- Built a shared private Flutter package powering all Appza variants. Designed a custom JSON-to-Flutter rendering engine for dynamic UI generation
- Architected offline-first sync engine for **Nourish** (play.google.com/store/apps/details?id=com.nourish.NourishERP), a veterinary data collection app for low-connectivity rural environments. 100+ SQLite tables with automatic cloud sync, 90+ APIs consolidated into batch operations
- Built **PosKeeper** (play.google.com/store/apps/details?id=com.poskeeper.com), a POS system for pharmacies with hybrid offline/online storage, invoicing, and ledgers
- Implemented clean architecture (MVVM, SOLID) and automated CI/CD with Fastlane
- Progressed from Junior Software Engineer to Project Maintainer, managing production releases across multiple Flutter projects

Freelance Software Developer

Feb 2022 - Present

Self-employed, Remote / International Clients

- Delivered 8 projects for international clients with 5-star rating across all reviews (freelancer.com/u/Saifulhossain831).
Notable: research testing project for University of Bonn, Germany

PERSONAL PROJECT

Studio-Ops - Autonomous AI Video Generation Pipeline

2026

- Built a platform orchestrating AI video models (LTX 2.3, Wan 2.2) across cloud GPUs (RunPod RTX 5090, A100). Integrated OpenClaw bot via Telegram for automated pod lifecycle and batch generation
- Implemented cost-aware scheduling: benchmarked serverless vs on-demand pods, reversed architecture decision based on empirical measurements. Tech: Python, ComfyUI, RunPod API, Docker

TECHNICAL SKILLS

Languages	Dart, Python, Java, C++
Mobile	Flutter (Android and iOS), cross-platform, GetX, BLoC
Backend	Firebase (Auth, Firestore, Cloud Functions), REST APIs
Database	SQLite, SQL, NoSQL (Firestore, Realtime DB)
Architecture	Clean Architecture, MVVM, SOLID, offline-first design
DevOps	Git, CI/CD (Fastlane), Docker, RunPod, cloud GPU management
AI/Automation	AI-assisted dev (Cursor, Copilot, Augment, Claude Code), AI model orchestration (ComfyUI), agent orchestration (OpenClaw)

EDUCATION

BSc in Computer Science and Engineering

Jan 2019 - Dec 2022

Uttara University, Dhaka, Bangladesh | CGPA: 3.50 / 4.00 | Competitive Programming: BUET, AUST, RUET IUPC 2022
